# OVERPRINT VARNISHES

## **VAN SON OVERPRINT VARNISHES, FOR USE ON ANY SHEETFED OFFSET PRESS**

### **Sonshine, High Gloss Overprint Varnish**

Universal high gloss overprint varnish. Sonshine provides an exceptionally high degree of abrasion resistance to the printed matter and can be used for both wet-on-wet and wet-on-dry printing. Sonshine has a very low tack, preventing the varnish from smearing when printing wet-on-wet. After varnishing the printed matter can be handled quickly. Sonshine's special composition minimizes the risk of blocking. This elastic, high-gloss varnish withstands cutting and creasing.

V5039 - 1 kg vacuum tin

V5040 - 2.5 kg vacuum tin

### **Matt Overprint Varnish**

Provides an excellent matt effect to the printed matter and can be used for both wet-on-wet and wet-on-dry printing. Spot varnishing or using a combination of glossy and matt varnish can create special effects.

V5081 - 1 kg vacuum tin

V5080 - 2.5 kg vacuum tin

### **Multiplast Varnish**

Special high-gloss overprint varnish for non-absorbent substrates that can be used in offset printing. Multiplast Varnish contains no solvents whatsoever. Only suitable for use in wet-on-dry printing.

V5087 - 1 kg vacuum tin

### **Anti-Ghosting Varnish**

A unique product! This varnish hides the effects of ghosting in the printed matter. Apply to the material to be printed in the same way as classic press varnish. For best performance, use only for wet-on-dry printing. Recommendation: Always print proofs before beginning!

Note: Only use this varnish after ghosting has appeared.

V5050 - 1 kg vacuum tin

### **Satin Overprint Varnish**

Universal satin overprint varnish which can be used as any classic press varnish. Satin Overprint Varnish is particularly suitable for printing on Matt MC stocks. This varnish provides an excellent rub-resistance to the printed matter, without affecting the matt effect of the paper. Satin Overprint Varnish can be used for wet-on-wet printing, and is suitable for all types of offset presses.

V5010 - 2.5 kg vacuum tin
